IIAM PUBLIC TRAINING

OVERVIEW

The volatile, uncertain, complex and ambiguous (VUCA) economic times over the past few years have had a major effect on how companies run businesses. Companies that used to operate smoothly with the help of forecasts and projections now refrain from making business judgements that are set in stone. Now, companies have a renewed focus: to manage risk!

Risk is the main cause of uncertainty in any organization. Risk, from an organization's perspective is the probability or likelihood of a threat materializing. The threats could be anything external to the organization or internal. Risk management is important in an organization because without it, a firm cannot possibly define its objectives for the future.

This uniquely designed workshop-styled program provides Internal Auditors, Risk Managers, Compliance Managers and anyone involved in business decision making, comprehensive knowledge on risk techniques and tools to be applied in practice to identify emerging risks, root causes and controls.

THE APPROACH

The use of relevant case studies, articles, scenarios and videos on Risk to reinforce the learning that will contribute towards risk & controls identification and root cause analysis.

An interactive learning session with live Q&As, quizzes, discussions / sharing of knowledge and experience.

Facilitator-guided and consultative-styled breakout activities designed to equip participants with better appreciation, understanding and application of Risk best practices.
