PRACTICAL RISK ASSESSMENT TECHNIQUES

FUNDAMENTAL REQUIREMENTS FOR RISK BASED INTERNAL AUDITING

Risk Based Internal Auditing (RBIA) approach requires internal auditors to focus on the provision of assurance and advisory services related to sound design, and functionality of enterprise risk management processes. Understanding management's planned risk responses, adequacy, and effectiveness of implemented controls to manage identified risks are also very important to internal auditors. This is to align and focus internal audit's limited resources on core business strategies, objectives, and other organizational imperatives to provide insightful, proactive, future focused assurance and advice to management and the board.

Risk assessment is the step-in enterprise risk management process which requires professionals to identify how strategic, operational, process, financial, compliance, and other significant objectives may be affected, and conduct analysis to determine potential impact and likelihood to decide appropriate response.

RISK ASSESSMENT TECHNIQUES, IPPF REQUIREMENTS, AND INTERNAL AUDITORS

Evaluation and improvement of the effectiveness of risk management processes are responsibilities of internal auditors which are established in the definition of internal auditing. Internal auditors use risk assessment techniques in developing internal audit activity's plan to ensure appropriate coverage of significant areas that matter and in determining priorities for allocating internal audit resources. Risk assessment is used to examine auditable units and select areas for review to include in the internal audit activity's plan which has the greatest risk exposure.
