PROGRAM OVERVIEW

Organisations are increasingly under pressure to understand and manage ESG risks, particularly as investors and regulators focus on organisations producing accurate and reliable reporting on sustainability efforts. That pressure is being reflected increasingly in executive performance as more organisations tie incentive compensation metrics to ESG goals. Additional risk areas associated with ESG are varied and can include reliance on third-party data, potential reputational damage from faulty reporting, and the real possibility that an organization's explicit commitments to meet specific sustainability goals could grow into a material weakness.

As ESG reporting becomes increasingly common worldwide, it should be treated with the same care as financial reporting. Organisations need to recognize that ESG reporting must be built on a strategically crafted system of internal controls and accurately reflect how an organization's ESG efforts relate to each other, the organization's finances, and value creation. This certificate program provides hands-on practical application of critical ESG metric identification and reporting.

Participants who complete the course are eligible to sit for the certificate exam, which is administered on The IIA's LMS platform, named IIA OnDemand.

Who will benefit from this program?

This certificate program is designed to enhance your current understanding of ESG concepts, including ESG reporting. This program is ideal for internal audit, risk management, and compliance leaders who currently possess a basic understanding of ESG topics and wish to enhance their knowledge and practical application of leading practices on how to assess their organization's existing ESG governance and compliance program. Participants who successfully complete this program are eligible to plus themselves by obtaining The IIA ESG Certificate – a wonderful addition to both your resume and LinkedIn profile!
