

PUBLIC TRAINING

KL06 – Performing An Effective Quality Assessment

9 & 10 March 2021

OVERVIEW

As an organization grows and its internal processes change and evolve, its quality monitoring process must keep pace. To ensure consistent quality in this dynamic environment, an ongoing commitment to growth and improvement is essential.

The required elements of a Quality Assurance and Improvement Program (QAIP) include periodic internal assessments and external assessments to demonstrate conformance with The IIA's International Standards for the Professional Practice of Internal Auditing. In addition, a quality QAIP can provide evidence to the audit committee and management that the internal audit activity is efficient, effective, and adding value. It can also build stakeholder confidence and document a commitment to quality, leading practices, and the internal auditors' mindset for professionalism.

This course will provide you with the appropriate knowledge and skills to plan, perform, and evaluate the results of an external quality assessment case study. You will also learn about the processes and tools in the IIA Quality Assessment Manual (QA Manual) that can help you identify opportunities to improve your internal audit quality activities.

OBJECTIVES

- Examine the process flow and tools in the updated QA Manual and explore how these can be used to evaluate conformance with the Standards and identify opportunities for continuous improvement.
- Practice using the QA Manual tools to plan, perform, and evaluate the results of an external quality assessment case study.
- Discuss how to use the QA Manual tools in a periodic self-assessment.
- Evaluate the external quality assessment options and determine which option will work best for your internal audit activity.
