

# INTEGRATED APPROACH TO AUDITING

## OVERVIEW

Integrating the knowledge associated from financial systems and the financial records of an organization or a business base, into a single audit produces a more effective outcome through a holistic approach. Evaluating business performance using COSO and ERM model.

Hence, the chief audit executive (CAE) should consider an integrated audit approach as part of the overall methodology used by the internal audit activity to achieve a more effective and efficient audit engagement. Current IPPF guidance provides a solid foundation for this approach. This course will discuss areas that enhance the audit engagement by providing guidance on areas that may differ between a prior traditional and current integrated audit approach.

The holistic view of an integrated audit requires the auditor to modify his or her perspective and think beyond the traditional audit scope. In the succeeding the integrated auditing, it requires a full understanding of the potential risk of the audit activity under all aspects of the audit scope together with sufficient soft skills to ensure effective teamwork among the audit staff and others who will provide expertise to the engagement.

## OBJECTIVES

Upon completion you will be able to:

- Differences between an integrated audit approach and a non-integrated audit approach.
- Advantages of an integrated audit approach.
- COSO and ERM model
- Sarbanes-Oxley Act
- Situations when a non-integrated audit approach may be more effective than an integrated approach.
