

# INTERNAL CONTROL PROCESS

## OVERVIEW

A strong internal control system is one of the best mitigation strategies for managing operational and financial risks.

An effective internal control process provides the users with a “reasonable assurance” that operations are conducted in an efficient and effective manner, compliance requirements are being met adequately, and that the financial information presented are accurate and complete which can be relied upon for informed decision making. It also plays an important role in preventing fraud, detecting fraud, and protecting tangible and intangible assets or resources.

In this program, the definition of internal control, its objectives, benefits, and types of internal control will be discussed. Design and implementation of internal control based on the COSO framework and its monitoring will be explained. In the last module, we will discuss how internal auditors can effectively review internal controls, identify deficiencies and provide recommendations for improvements.
